

CITY MANAGER'S WEEKLY UPDATE

February 19, 2015

VINTAGE OAK LIFT STATION IMPROVEMENT PROJECT

The temporary by-pass pumps have been installed and are now in operation. The existing lift station has been taken off-line. The temporary by-pass pumping will continue for the next several weeks. The Contractor is currently removing equipment in the lift station in preparation for cleaning of the sump.

DESIGN AND ENVIRONMENTAL PROJECTS

Staff issued a request for proposals for design and environmental services for three grant funded projects in the southwestern portion of the City. The improvements include roadway rehabilitation on A Street; sidewalk improvements on 2nd Street; and safe routes to school improvements surrounding Greer Elementary School, Valley Oaks Elementary School and Galt High. Due to the geographic overlap and similarity of the improvements, the three grant funded projects will be designed and constructed as one project.
