

CITY MANAGER'S WEEKLY UPDATE
March 3, 2016

HARVEY PARK UPGRADE

The new pre-cast concrete restroom building was set in place this week at Harvey Park. This work is funded through a State Housing Grant.

UPRR TRACK REPAIRS UPDATE

UPRR crews have completed the first phase of planned track repairs through Galt. This consisted of the replacement of rail ties and supplemental ballast material. Phase 2 will replace the rail panels at each of the roadway crossings through town. This will require the closure of each crossing for 3 to 4 days each. Only one crossing will be closed at a time, with detour signage in place at each closure. This work is tentatively scheduled for late March or early April. Press releases will be issued as the work window draws near and schedules are confirmed.
